Summary

Backend-focused AI Engineering intern and Computer Science undergraduate with hands-on experience building Android applications (Java) and AI-assisted tools. Strong foundation in data analysis (Google Data Analytics Professional Certificate, in progress) and a consistent record of shipping functional, well-documented projects independently. Seeking to apply backend development and AI engineering skills in a high-impact software engineering role.

Education

University of Layyah

Bachelor of Science in Computer Science

CGPA: 3.48 / 4.00 (6th Semester – Result Awaited)

Layyah, Pakistan

Expected 2028

Experience

Backend AI Engineering Intern

Jul 2026 – Present

FlyRank AI (Remote)

- Selected for a remote internship focused on backend systems and applied AI engineering, supporting production-grade AI-driven workflows.
- Completed structured onboarding covering internal tooling, codebase standards, and team workflows ahead of full project assignment.

Independent Software Developer

2024 – Present

Self-Directed Projects

- Designed and developed four Android applications in Java spanning job-search, healthcare, education, and fitness domains, each with complete UI, core logic, and local data handling.
- Built RozgarFind, a job-marketplace Android app concept targeting Pakistan's local job market, using AI-assisted development tools to accelerate prototyping and iteration.
- Maintained a public GitHub portfolio with professionally written, screenshot-verified documentation for each project to ensure accuracy and clarity for technical reviewers.
- Iteratively refined personal branding materials (resume, GitHub profile) through multiple structured feedback cycles, improving clarity and presentation quality.

Projects

RozgarFind – Android job-marketplace app concept for Pakistan's local employment market

User Record System – Full-stack web application with complete CRUD functionality; PHP backend with MySQL database integration and responsive HTML/CSS frontend.

MedBot – Android health-assistant app for basic guidance and information lookup

Flashcard Quiz App – Active-recall learning app with custom decks and scoring logic

Fitness Tracker App – Workout and fitness-metric logging app with clean UI

Skills

Languages: Java, Python, SQL

Platforms & Tools: Android Studio, Git, GitHub, VS Code, PyCharm

Data & Analytics: Excel, Data Cleaning, Data Visualization, Spreadsheet Modeling

Concepts: Object-Oriented Programming, Mobile App Development, AI-Assisted Development, Backend Fundamentals

Other: Technical Documentation, Self-Directed Learning, Freelancing Fundamentals

Certifications

- **Programming for Everybody (Getting Started with Python)** – Coursera | University of Michigan | Jun 2026 | Grade: 97.52% | [Verify](#)
- **Google Data Analytics Professional Certificate** – Coursera | In Progress (Course 3 of 9)
